Dear Harold;

Sorry I haven't written to you and Lil in such a long time. From what I see on T.V. you must really be having a rough winter. Does the mail still get through and hold up the tradition? We have been having our share of wet stuff out here. When you were going to come out here last year I mentioned that I had a friend in Malibu that you might have stayed with when I was trying to work things out. Well, the tide has benn the biggest ever and has undermined a good portion of the house and patio. The waves have been breaking at the bulkhead which is about 100 feet from where they usually break. The ocean in this area seems to have raised and not by tides. It seems that the weather all over has been going through a big change or maybe its just a cycle. I have been reading about Nikolai Tesla and the Russians discovering some of his methods or discoveries in weather modification. Some pf this has been in the papers. By the time you get this the TV Ruby and Oswald will have been on. It sounds like another propaganda piece.

Hope this finds you and Lil well and not frozen. I am back to work On a show called Operation:Runaway. About an ex-cop psycologist traking down runaway kids.

My best also to Jim.

Best,

Paul
